

Metallic Shines with Next Major Global Expansion of Award-Winning BaaS Solutions in Asia Pacific

October 5, 2021

The industry's gold standard in Backup-as-a-Service now available in more than 30 countries worldwide

TINTON FALLS, N.J., Oct. 5, 2021 /PRNewswire/ -- On the heels of its most recent expansion into the Czech Republic and Slovakia, Commvault (NASDAQ: CVLT), a recognized global enterprise leader in Intelligent Data Services across on-premises, cloud, and SaaS environments, today announced that its award-winning Metallic™ Backup-as-a-Service (BaaS) solutions are now globally available across 30 countries, including in Asia, with portfolio availability in Hong Kong, India, Malaysia, and Singapore. Metallic is also now generally available in additional geographies through Metallic managed service provider (MSP) partners.

"As enterprises across APJ adopt cloud services faster than ever, the demand for agile, cloud-delivered data management to mitigate cyberthreats, ensure recoverability, and drive compliance is rising," said Manoj Nair, General Manager, Metallic. "With today's news, customers and partners around the globe now have access to Metallic's unmatched portfolio of cloud-native SaaS offerings to protect all major enterprise workloads at massive scale. Not only that, but Metallic also ensures customers won't be waiting up to 10 days for a restore – with unique flexibility to protect data close to the source – on-prem, in the cloud, or to the Commvault HyperScale X appliance."

Metallic provides simple, flexible, and integrated data protection for cloud and hybrid cloud workloads as opposed to point products that solve only part of the problem. Metallic's capabilities, including breadth of coverage for SaaS applications, endpoints, hybrid cloud datacenter workloads, and its unique SaaS Plus storage flexibility eliminate the need for disparate point solutions and siloed data. With simplified management, reduced infrastructure costs, and fast time to value for customers, Metallic provides quick and easy protection for all data with a simple, easy-to-use SaaS model.

Bringing Metallic innovations to more parts of the world is an ongoing priority for Commvault, as is constant innovation. Metallic recently added to its arsenal with all-new [Metallic™ Backup for Microsoft Dynamics 365](#) and Microsoft Azure Active Directory protection solutions, and enhancements to the Metallic Cloud Storage Service. With the addition of Metallic Backup for Microsoft Dynamics 365, Metallic supports all three Microsoft cloud platforms – Dynamics 365, Microsoft 365, and Azure.

"Ingram Micro is pleased to expand our relationship with Commvault to Asia and bring its high-performance, scalable Metallic SaaS cloud solutions to our customers and partners. Asia is a growing market for powerful SaaS solutions proven to effectively manage and protect business-critical data. We are thrilled to build on the success of our Commvault business and work together to create more value for our customers and partners in Asia and worldwide," said Diego Utge, EVP Global Group President, APAC, for Commvault distribution partner Ingram Micro Inc.

Commvault continues to dedicate much of its best talent to support the APJ region, most recently with the appointment of Kelly Chan as Area Vice President for Metallic Sales for APJ. As the new AVP for Metallic in the region, Chan has been appointed to lead the growth trajectory with a dedicated focus on expanding Commvault's Metallic footprint across APJ as customer requirements region-wide continue to shift to SaaS technologies.

Along with the countries announced today, in total Metallic is available in the U.S., [Canada](#), [Australia](#), New Zealand and more than a dozen countries across Europe through Commvault resellers and distribution partners.
