

Commvault Launches Metallic® Data Management as a Service (DMaaS) Portfolio in Japan

February 8, 2022

The industry's gold standard in DMaaS now available in more than 30 countries worldwide

TINTON FALLS, N.J., Feb. 8, 2022 /PRNewswire/ -- Commvault (NASDAQ: CVLT), a recognized global enterprise leader in intelligent data services across on-premises, cloud, and Software as a service (SaaS) environments, today announced its award-winning Metallic® portfolio of Data Management as a Service (DMaaS) solutions is now available in Japan. The full suite of Metallic SaaS-delivered data management offerings is now available in more than 30 countries worldwide with comprehensive workload coverage, and unmatched flexibility for performance and scale.

Since its launch in October 2019, Metallic has been implemented by more than 1000 customers globally, offering seamless deployment and managed data protection and rapid recovery, archiving, and compliance measures for a broad set of workloads, including Software-as-a-Service (SaaS) applications, such as Microsoft 365 and Salesforce, endpoints, and hybrid cloud workloads from VMs to enterprise databases to unstructured data. The use of Metallic in the SaaS model As a SaaS solution, Metallic allows customers to simplify management, reduce TCO, and easily predict future costs.

Metallic SaaS service is running on West Japan region of Microsoft Azure platform

Metallic is a cloud-native solution built leveraging Azure Platform-as-a-Service (PaaS) and native services. Leveraging Commvault industry-leading technology, alongside the durability and security of Microsoft Azure, backed by more than 3,500 security experts and more than 90 compliance certifications, Metallic delivers peace of mind for customers that their data is protected and recoverable. With multi-layered security, advanced encryption, and zero-trust access controls built-in, Metallic offers a virtually air-gapped service that prevents unwarranted access, preserves and isolates data copies, and enables users to rapidly restore data to drive business continuity and minimize threats.

Price advantage

Because it's a SaaS solution, Metallic reduces reliance on on-premises infrastructure and helps customers save on maintenance and administrative costs, as they move from capex to opex expenditure. Backups for Microsoft 365 (Office 365), Microsoft Dynamics 365, and Salesforce offer unlimited storage capacity and an indefinite data retention period at a base rate. Endpoint backups also offer unlimited storage capacity and a one-year data retention included. For Hybrid Cloud workloads, customers can leverage existing investments, and bring their own cloud or on premises storage, or get up and running quickly with Metallic Cloud Storage Service, with flexible and cost-optimized tiers.

Simple and easy installation and management

By using Metallic it is no longer necessary to build a new backup system as was done in the past, and backup can be started in a few simple steps. Not only is it easily scalable on demand, but backup management for all workloads can be centrally managed from the same web-based console.

Broad coverage across workloads for hybrid cloud and on-premises

Metallic protects remote, on-premises and cloud environments. It supports key workloads for SaaS applications, endpoints, file servers, DB servers, cloud storage, virtual machines, and Kubernetes. In addition to Metallic's cloud storage, you can use your own storage or cloud storage (BYO storage) as the backup destination.

Long-standing alliance with Microsoft

Commvault has a strong partnership with Microsoft, spanning over 20 years. This alliance makes it possible to provide better service to our customers.

Reference price and provision method

- Metallic Office 365 Backup Essentials Edition: 1 user monthly fee 540 yen (excluding tax)
