McAfee, Inc. and CommVault Form Strategic Alliance to Deliver Integrated Data and Security Management Solutions

October 21, 2008

- Industry-Leading Technology Providers to Offer Integrated Solutions Worldwide, Built on McAfee ePO and CommVault Simpana Software -

LAS VEGAS--(BUSINESS WIRE)--

McAfee (NYSE:MFE) and CommVault (NASDAQ:CVLT):

-- McAfee, Inc. (NYSE: MFE) and CommVault (NASDAQ: CVLT) today
   announced a strategic partnership to deliver an integrated
   data and security management solution built on the two
   companies' respective data management, backup and security
   expertise.

-- The agreement will provide customers worldwide with access to
   integrated data and security management technology solutions
   from both McAfee and CommVault.

-- The solution integrates McAfee ePolicy Orchestrator(R)
   (ePO(TM)) software, McAfee's security risk management
   platform, with the award-winning CommVault(R) Simpana(R)
   software, which delivers Backup, Replication, Archive, Storage
   Resource Management and Search capabilities.

-- As part of the partnership, CommVault has also joined the
   McAfee(R) Security Innovation Alliance, McAfee's technology
   partnering program, which is designed to accelerate the
   development of interoperable security products and simplify
   the integration of those products with complex customer
   environments. Additionally, McAfee has joined CommVault's
   PartnerAdvantage(TM) program as a Strategic Partner to help
   expand product integration efforts, compatibility testing and
   further align the companies' go-to-market strategies.

-- The McAfee-CommVault solution will enable mutual customers to
   monitor corporate data for increased security and compliance
   with simplified policy management. The integration allows
   McAfee ePO users to report on the data protection/recovery
   state of end point clients to identify conditions such as the
   backup status. When that condition is outside the prescribed
   protection policy threshold it can trigger an alert
   notification or report to warn the ePO user. Additional
   integration features are expected to target expanded software
   distribution and data leakage profiling using the Simpana
   Search and eDiscovery features.

-- This partnership highlights the ongoing commitment of both
   companies to provide customers with powerful solutions that
   address both security and data backup. The solution will not
   only help reduce the complexity in customers' IT environments
   but also improve protection, compliance and lower the Total
   Cost of Ownership.

   Availability

-- The initial phase of the integrated McAfee ePolicy
   Orchestrator and CommVault Simpana software solution is
   expected to be available in 2009. For more information on

    Supporting Quotes

    --  "Business requirements and security threats demand a blended
        approach to storage and security. In coming together,
        CommVault and McAfee can provide customers with award-winning
        data protection capabilities that work hand in hand with
        industry-leading security applications for a complete, more
        easily deployable and cost effective data and security
        management solution," said Lauren Whitehouse, analyst,
        Enterprise Strategy Group.

    --  "In today's uncertain economy and changing regulatory
        environment, IT directors and compliance officers need sharper
        and more real-time visibility into business risks," said N.
        Robert Hammer, president and chief executive officer,
        CommVault. "The integration between Simpana software and
        McAfee ePO software will help businesses make more informed
        and rapid business decisions. Our partnership with McAfee is
        another step in our continued efforts to deliver customers
        added value through strategic industry alliances. We look
        forward to a mutually rewarding partnership with McAfee and to
        exploring other synergies between our two companies."

    --  "Mitigating business risk is essential and customers are
        demanding a solution that addresses both their backup and
        security needs," said David DeWalt, CEO, McAfee. "Our
        partnership with CommVault builds on their data management and
        our security management and protection expertise, allowing us
        to offer an integrated data and risk management solution that
        is simple and cost-effective to deploy."
