Simpana® 9 Software and Data Deduplication

- CommVault continues to lead the industry in delivering innovative technologies that address pressing IT challenges. By integrating source and target-side deduplication into a singular, unified data management platform, Simpana 9 software provides best-in-class performance to dramatically reduce time-to-backup and the impact on your overall environment.
- Source-side deduplication eliminates redundant backup and archive data at the client before sending it across networks, servers and storage. Users can easily extend file deduplication reduction globally, across thousands of clients having different retention requirements. This all adds up to shorter backup windows, lower management costs, and more robust, reliable data protection.
- With Simpana 9 deduplication, users can significantly improve their backup performance and protect themselves from the perils and costs associated with hardware vendor lock-in and can expect to reduce the amount of backup and archive data stored to disk, tape, or the cloud by as much as 90 percent.
- CommVault was the first backup and recovery software provider to fully integrate deduplication into a single software solution. Building on its leadership in this area, Simpana 9 software expands deduplication benefits to address real bottlenecks by bringing efficiencies as close to the source as possible.

Supporting Quotes

Steven Rose, EMEA VP at CommVault

- "We are honored that Simpana 9 has been recognized by end users for its ability to extend the benefits of data deduplication across the enterprise. With fully integrated modules for backup and recovery, archiving, replication, search and eDiscovery, all managed from a single console, CommVault's unique approach to modern data management can reduce costs, use fewer network resources, shorten backup windows, and eliminate lock-in associated with appliance-based approaches. This win is yet further proof from actual users that Simpana software helps transform the way enterprise data is managed and protected."
