Cloud Adoption, Workload Portability and Converged Infrastructure Topics Addressed by Commvault at VMworld 2015

August 28, 2015

-- Commvault experts to lead multiple Breakout Sessions --
-- In-booth Tweet Up to address critical data management topics --

TINTON FALLS, N.J., Aug. 28, 2015 /PRNewswire/ -- Directly addressing the needs of companies seeking trusted advice and counsel on critical data protection and information management issues, Commvault (NASDAQ: CVLT), today announced a full schedule of expert breakout, one-on-one, and social engagement sessions for VMworld attendees providing real-time advice to attendees at the VMworld 2015 conference, held August 30 – September 3 at Moscone Center in San Francisco.

A leader in enterprise data protection and information management

"Companies today understand that data is the lifeblood of innovation – then they look at cloud alternatives, exploding volumes of data, and the need to modernize legacy systems – and many realize the critical need to revisit how they protect the data, how they securely access it, drive compliance needs and, most importantly, use it to drive business value," said Chris Powell, Chief Marketing Officer, Commvault. "At Commvault, we are focused on helping customers find new ways to manage data as a strategic asset and activating data for increased business value. We look forward to engaging with attendees at VMworld in San Francisco."

Commvault *Workload Portability Tweet Up*

A Commvault Tweet Up at VMworld will be held in the Commvault Booth 1605 on the show floor on Tuesday morning at 11:30am PST. The *Workload Portability Tweet Up* will discuss key industry trends and the importance of workload portability (across physical, virtual & cloud), disaster recovery in the cloud and the need for streamlined dev/test, including cloud provisioning, management, reporting and log analytics. Join the conversation at #CVTweetUp.

Commvault Breakout Sessions at VMworld 2015

With a focus on helping attendees make VM data protection look easy, Commvault experts will be leading three Breakout Sessions covering everything from virtual infrastructure to cloud adoption and backup:
